Steps to download and install the Java Application

1. Please goto <u>http://java.com</u> to download & install the java application before downloading the KITS trading terminal.

2. Press Free Java Download button to download the java application to install on your system.

3. Press Agree and Start Free Download button to proceed the downloading

4. Press Run button to start downloading

A user access control window pops up which says "Do you want to allow this application to make the changes on your PC?"

5. Click Yes to proceed.

6. Click on Install button and wait, another window pops up

5. Please enter your User ID and password you have received earlier.

The trading application has been successfully installed on your system and an icon will be appeared on your desktop for your ease of use.

To run the web based trading terminal you'll need to follow below steps:

For KiTS web login

Below are the links from which you can add or update plug-in in web browser. If Java is installed and Web Login is redirecting to Oracle site, kindly update the plug-in by following the steps in URL and then you will be able to access the Web Login.

https://java.com/en/download/help/enable_browser.xml

https://java.com/en/download/faq/chrome.xml

Note: The 2nd URL is information about chrome issues.

For Mobile Users

Goto Play & Apple Stores accordingly and type in search KITS Mobile App

Select and install the 1st KiTS Mobile App on your device.
